

HOW CAN **MY HEALTH RECORD** HELP ME IF I HAVE ALLERGIES?

What are the benefits of using My Health Record?

Does My Health Record have information about my allergies, tests and medications?

Who will view this information, and will it be helpful in my care?

We'll be answering these questions and more in a presentation on My Health Record followed by a Question and Answer session with a panel of experts. You'll have the opportunity to ask your questions and hear the consumer, GP and specialist perspectives on My Health Record and allergies.

To submit a question, [register via the QR code below](#) and enter your question in the field provided. There will also be an opportunity to ask questions live, throughout the Q&A session.

This webinar will be recorded and available on the National Allergy Strategy My Health Record project website.
