

NATIONAL ALLERGY STRATEGY ACHIEVEMENTS

Approximately 2,900 people enroll in the 'All about Allergens' courses each month.

A recent study has shown that the annual rate of increase in infant anaphylaxis has slowed in those aged 1-4 and 5-9 years, indicating that the Nip allergies in the Bub project may be helping to reduce food allergy.

The Allergy 250K school aged teen camps increased participants confidence in food selection by 62% and confidence to tell an adult about their allergy by 67%.

Developed and launched the first Best Practice Guidelines for anaphylaxis prevention and management in schools and children's education and care (CEC) services.

The four 'All about Allergens for Hospitals' courses have an average of 850 course enrolments per month.

The My Health Record project reached 115 ASCIA members and 85% reported that they understood the main features and functionality of MHR after the sessions.
